

Aloe Advantage has a three-year plus shelf life! Any of the 3 Steps can be purchased separately. This wound care kit is designed to address all levels of wound care. Anything from scrapes and sunburns to disastrous unstichable wounds!

What is ALOE ADVANTAGE MATRIX 3-Step System?

The ALOE ADVANTAGE MATRIX 3-Step System is a convenient, cost effective combination of the 16 ounce ALOE ADVANTAGE Cleanser, 16 ounce Treatment and 8 ounce Salve Squeeze Tube. It contains everything you need to treat a wide range of wounds. The synergy of using the three products throughout the healing process creates an ideal healing environment that is unmatched by anything else on the market. All are packaged together in handy clear vinyl bag with zipper and handles for easy storing in the barn or trailer. Aloe Advantage Matrix 3-Step System is backed by veterinarian research and the best science. **John Lyon's Perfect Horse has rated it...** *"The Phenol Aloe Wound Treatment System might be just the thing to try if you are running into problems trying to treat an obviously infected wound."*

How do I use ALOE ADVANTAGE MATRIX 3-Step System?

Step One: Point and spray-7 PSI to flush and cleanse the wound. No rinsing needed.

Step Two: Point and spray to cover wound. The hydrogel will adhere to and be absorbed into the wound. Adjustable trigger sprayer allows for even coverage without cross contamination.

Step One and Two requires no wrapping or cover unless wrapping is necessary to stabilize and minimize excessive granulation prior to treatment.

Step Three: Apply in a sterile manner directly to the wound, once the wound has started to granulate and is not excessively wet.

Do I have to use all three steps together? **No.** While all three products work synergistically together, there are instances when you will only be using one step or another for wounds of varying severity or during different stages of the healing process. Step One, the Cleanser, will be used for the initial cleaning, disinfection and debris removal of an active wound. Step Two, the Treatment, can be used alone or after Step One. Step Three can be used for simple cuts and scrapes after cleaning or on more serious wounds once Step Two has dried or when bandaging is required. If there is one "catch-all" product in the bag, it is Step Two, the Treatment.

How does this work on proud flesh? The ALOE ADVANTAGE MATRIX 3-Step System, when used as directed, can prevent proud flesh.

Can I use on other animals? Yes, the ALOE ADVANTAGE MATRIX 3-Step System is effective not only on horses but goats, other livestock and dogs. **Do not use on cats**, because of their high level of sensitivity we recommend you only use products prescribed by your veterinarian on cats.

Why should I use ALOE ADVANTAGE MATRIX 3-Step System instead of other products?

The ALOE ADVANTAGE 3 Step System is designed by scientists and tested by veterinarians to be the best product on the market for the easy, effective and quick healing of wounds of all degrees of severity. Phenol is a powerful anti-bacterial and anti-fungal that actually numbs on contact for quick pain relief. Many of the other products on the market sting and irritate the animal. Aloe has been used for centuries as a natural, effective healing agent. Why wouldn't you use products that work together to treat a wound versus unrelated products that might actually react to one another in a negative manner? Most importantly, the product is backed by veterinarian research and the best science. **John Lyon's Perfect Horse has rated it and the continual customer testimonials are always impressive!** Horse owners are always reporting other advantages to the three steps around the barn.

Step One *ALOE ADVANTAGE Wound Cleanser with Phenol *

What is ALOE ADVANTAGE Wound Cleanser with Phenol? The ALOE ADVANTAGE Wound Cleanser is a phenol and aloe liquid spray used to clean debris, bacteria, fungi and dead skin cells from a wound while numbing and inhibiting infection. The ALOE ADVANTAGE Cleanser comes in a 16-ounce spray bottle. Does not sting or stain. If the wound is a puncture, place the dispenser on *stream* and irrigate well. If the wound is a large surface area then place the dispenser on *spray*.

Step Two *ALOE ADVANTAGE Hydrogel Treatment with Phenol *

What is ALOE ADVANTAGE Hydrogel Treatment with Phenol? The ALOE ADVANTAGE Hydrogel Treatment is a phenol and aloe gel spray used to safely treat a wound by keeping it moist, encouraging cell growth and collagen production, while decreasing inflammation, numbing and inhibiting infection. Keeping wounds moist avoids scabbing and scarring. The ALOE ADVANTAGE Treatment comes in a 16-ounce spray bottle.

Is there research on the benefits of Aloe in wound healing? Yes, research has shown the topical effect of Aloe Vera on wound healing in mice over a 7-day period resulted in a 50.8% decrease in wound diameter. Aloe Vera healed third degree burns six times faster than traditional medicines, including Silver Sulfadiazine. Aloe extract decreased inflammation 29.2% when applied topically. Aloe Vera has been shown to stimulate the replication of skin fibroblasts three times as great as healing in the control. There is also research showing mice treated with Aloe represented nearly 3 times the tolerance to painful stimuli as compared to untreated animals.

How do I use ALOE ADVANTAGE Treatment? Point and spray to cover wound. The hydrogel will adhere to and be absorbed into the wound. The adjustable trigger sprayer allows for even coverage without cross contamination.

Step Three *ALOE ADVANTAGE Aloe Wound Salve with Vitamin E *

What is ALOE ADVANTAGE Aloe Wound Salve with Vitamin E? The ALOE ADVANTAGE Wound Salve forms an aloe-based permeable barrier against contamination and flies, which allows the wound to breathe, keeps it moist and promotes healing from the inside out. It accelerates cell growth and has anti-inflammatory properties. **Is rated as "The overall winner." in John Lyons Perfect Horse.** ALOE ADVANTAGE Salve comes in an 8-ounce convenient squeeze tube and 16-ounce jar for value.

How do I use ALOE ADVANTAGE Aloe Wound Salve with Vitamin E? Apply directly to the wound, once the wound has started to granulate and is not excessively wet. Apply in a sterile manner.

Can I use ALOE ADVANTAGE Aloe Wound Salve with Vitamin E under wraps and bandages? **Yes.** The Wound Salve will actually help keep bandages from sticking to wound.

It is not a question of if they will get injured; it is a question of when. Be sure to have on hand your Aloe Advantage Matrix 3 Step Wound Care Kit!
